## **DETAILED ACTION**

### **Election/Restrictions**

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I,        claims 1-18, drawn to DNA, vector, transformed cells, polypeptides, and a first method of use for diagnosis *in vivo*.

Group II,       claims 19-22, drawn to second method of use for diagnosis *in vitro* using cells.

Group III,      claims 23-26, drawn to third method of use for diagnosis *in vitro* using antibodies.

Group IV,       claims 27-34, drawn to fourth method of use for vaccination.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the DNA is a single inventive concept, and as such the corresponding vectors, transformed cells, polypeptides encoded by the DNA, and a first

method of use of the polypeptides are included in the first invention. The remaining Groups II-IV are additional methods of use, not requiring the DNA, but can utilize isolated and purified polypeptides obtained from *M. tuberculosis*.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
